SUMMARY

I am an SAP Fiori Developer with over 2 years of experience in developing enterprise-grade Fiori applications, coupled with OData, Node.js, or Python-based backend development. I have great problem-solving and communication skills to transform business ideas into fully functional applications in the SAP landscape. I am a quick learner and open to learning any technology to be market-ready.

SKILLS

Languages: C++, JavaScript, TypeScript, Python, ABAP, SQL, HTML5, CSS3

Frameworks & Libraries: Next.js, React, Node.js, Express.js, RESTful APIs, OData, Recoil, Redux, Fiori UI

Cloud, DevOps & Databases: PostgreSQL, Supabase, HANA DB, AWS EC2, Render, Vercel, Firebase, Docker, Git, GitHub Actions, Azure DevOps (ADO)

Emerging Tech & Enterprise (SAP): Generative AI, Large Language Models (LLMs), Prompt Engineering, SAP BTP, CAP, CDS Views, S/4HANA RISE

EXPERIENCE

V3iT Consulting Pvt. Ltd. | *Fiori, Python, AI, Automation, Documentation, Testing, Debugging* Aug 2024 – Present
SAP Fiori Developer Remote

- Converted over 80 ABAP program-based SQ01 queries to Analytical Core Data Service (CDS) Views.
- Converted CDS Views to Fiori Elements List apps on Business Application Studio (BAS) using Python and AI automation pipeline.
- Performed SPAU, SPDD, and SPAU_ENH reconciliations for the latest S/4HANA Cloud RISE system migration.
- Created Python script using Playwright to automate the task of adding over 2000 catalogs and tiles, saving hundreds of hours.
- Solved ad-hoc problems while migrating an old 2021 S/4HANA system to the latest 2025 S/4HANA Cloud with RISE system.
- Provided technical implementation guidelines for business functions related to Supply Chain Management (SCM) projects.
- Created technical specifications, ADO testing steps, and quick reference documents, and tested the Fiori apps from frontend to backend.
- Automated the task of creating User-Specific manuals for User Acceptance Testing (UAT) using Python.

PROJECTS

VLR Duel Game | *Next.js, PostgreSQL, Supabase, Python, WebSockets, Tailwind CSS* Jan 2026 – Feb 2026

- Created a WebSocket-based real-time 1v1 multiplayer game using Next.js, Tailwind CSS, Supabase Realtime, and Python.
- Implemented Login and User Management, Matchmaking Logic, Game Logic, and Score Calculation logic from scratch.
- Added database-level restrictions to avoid Race Conditions, Real-time and Low-latency database updates.

Cognitive Therapy Chatbot | *React, Python, Node.js, Firebase, AWS EC2* May 2023 – Jun 2023

- Designed a fully functional web application containing a Chatbot trained to provide mental health-specific guidance using React, Firebase, Tailwind CSS, and the OpenAI API. Deployed the application to AWS EC2 Lambda instance with PM2 NPM package.
- Created a recommendation engine using Python, which recommends articles and blogs by analyzing the user conversation.
- Implemented community forum page with Post, Comment, Upvote, Downvote, Edit, and Delete functionalities from scratch.
- Created a web scraper using Python to scrape the latest news, blogs, articles, and content within 1000ms.

EDUCATION

Indian Institute of Technology, Roorkee 2020 – 2024
B.Tech in Electronics and Communication Engineering (CGPA: 7.348) Roorkee, Uttarakhand
